The recent falling back of the rebels from infront of our lines, though lastened by a fight, proceeding from a built that they were about to be ettacked, was probably a military necessity. At best, the reads of Vinginia, except the from pikes, in wet weather, are of the worst description—the clayer roll seen becoming out up with ruts—which make the passage of vehicles of an army is to be transported over them, the continuoup passage of heavy wagous renders them all but impassable. Loudon and Fairfax cunties have been relieded of their stock, forare, and grain, and to day they hardly peaks stocked by the first the stock for and have been relieded to their own doesn necessary for their citizens. Wagous also have been taken and the people have no congril vehicles left to got fuel to their own doesn necessary for their personal compart. Though the relief have seeded in the wagens they could by hill they may easen have set as during the second the stock for an army. Now, however, that the rainy season have set in, and all suppless made for warded from Mannesas to the relief has in the vicinity, the insulhiciancy of their transportation becomes more apparent, and lence the necessary of drawing in their lines to Centerville, where they are but a short distance from railroal transportation, upon which they must mainly depend.

TREASURY DEPARTMENT, Lichmond, Oct. 17, 1861. to the Conveniesumers Appointed to Receive Sub-scriptions to the Freduce Loui: GENTLIMEN. Inquiries have been made from arious quarters.

1. Whether, during the continuence of the leckede, efforts should be made to procure further subscriptions.

blocked, efforts should be made to produce further subscriptions.

2. Whether the tievernment will entherize premises to be held out of eid to the planters, as an inducement to such further subscriptions.

The first inguly seems to imply a manufarchanding of the scheme of the subscriptions. Many persons have supposed that the forement was to have some control of the produce itself others that the time of sale appointed by the subscription was to be absolute and one conditional. The cuption at the head of the lists, when examined, will correct both these errors. The induciption is confined to the proceeds of sales, and contains an order on the commission merchant or factor of the planter to pay over to the Treasurer the amount subscribed, in exchange for Confederate bonds. The transaction is simply on agreement by the planter to lead the foreneement as much money, and in order to complete the transaction at time and place are appointed when the parties may used to carry it out. The impactant a interest in that it shall certainly be

plote the transaction a time and place are appoin-ed when the parties may meet to carry it out. The important point is that it shall certainly be completed at come time, and that it second by the engagement of the planter.

Whether that time he December or June, is simply a question of convenions, and works no thoury to either party. The towernment is sure of the eventual payment, and derives from that certainty so much credi, and it loses mething, because it gives its bond only when the money is paid.

It is obvious, therefore, that the subscription are as valuable to the bovernment during the blockeds se after it. The blockeds simply sus-joinds the completion of the engagement. It be-comes the interest of both parises to wait for a good piles, and the bovernment will readly connt to a postponement of the sale.
You receive, therefore, that it is desirable to

S. The next injury is as to promise of mate-ial aid from the government to the plantors. In answering this inquiry, I om to speak in dwence of any set of Congress. What that dy may see at to do in not for me to determine, secrete the inquiry to say that the action of the government of settled by the constitution. Do government a settled by the constitution. No power is pranted the any deportment to lond money for the relief of any interest. Even the power of Congress on relation to money is contined to berrowing, and no clause can be found which would sandrous or stayondous a release as pur-chasing the entire crop with a view to aid the con-ers. But it may be said that the constitution of he provisional in vernment may be altered be language, and it is the duty of this department o prepare the way for such alteration, if in it udgment the financial necessities of the country

smand the change.

I am not disposed, then, to close the inquir ith the abrupt manner thus made by the Con-itation, and will proped to consider the subject attention, and with present to consider the suspen-ages it, intrinsic neerest.

Two plan of relief have been proposed. The one is that the Government about purchase the astire error of the country, the other that an ad-rence should be needed; part of its value. In suther case the present is to be made by the is-suance of treasure notes and, therefore, if we put aside for the present the many and errors of the strength of the reasonar, transportation, and

and sade for the present the many and a rous direction to the possession, transportation, and management of the crop by the Government, it secones simply a question of amount. To purhase the whole of a possion of amount. To purhase the whole of a possion of amount. To purhase the whole of a possion of amount of sub-criptions made to the evenament. If we estimate the whole crap of other as \$20,000,000, and the sub-cription at \$20,000,000, the probase would then require \$10,000,000 of treasmy motes, and if to this sum as added the amount of value for other agricultural products, which would certainly claim the time hench, the sum required would probably such \$1.0.000,100. such \$1.0.00(100).
